

# ENVIRONMENTAL POLICY STATEMENT

## Page 1 of 1

It is the policy of Coleman Construction and Utilities Limited to manage all of its activities so as to give benefit to society, ensuring that they meet relevant laws and regulations, are acceptable to our customers and the community at large and that their environmental impact is reduced to a practicable minimum. In so doing, the company will ensure compliance with its responsibilities under UK environmental legislation.

There are four areas in which we will positively influence environmental awareness and compliance:

- In support of our core activities, we will ensure that our process for procuring consumable supplies maximise the use of biodegradable fluids and sustainable raw materials, those that can be re-cycled and those that have already been recycled
- We will ensure that our procedures for disposing of all waste materials allow compliance with applicable legislation and duty of care obligations and maximise the possibility for the segregation of waste that can be re-cycled from that which can't
- We will maximise the efficiency of our use of consumed energy through the adoption of an efficient transport policy for our personnel and the control of the use of our electrical supplies and consumables at premises under our control
- We will promote the highest standards of environmental excellence in customer organisations by matching our project environmental controls with the policies of our customers

Coleman Construction and Utilities Limited shall:

- Encourage and promote best practice and continual improvement in environmental performance
- Commit to the prevention of environmental pollution in relation to Coleman Construction and Utilities Limited activities
- Provide information and assistance to ensure that materials, plant and equipment are used and stored throughout their life-cycle (including their disposal) in a safe and environmentally responsible manner
- Set and monitor environmental objectives across the business, aiming at continuous improvement in environmental performance
- Promote the open exchange of environmental information with customers and suppliers
- provide appropriate environmental training where necessary
- Comply with the requirements of its customer's environmental policies
- Ensure efficient off-site disposal or re-use of waste materials

This policy statement is reviewed annually to ensure its continued relevance and adequacy and is available to interested parties on request. It is part of the company's training programme to ensure that this policy statement is briefed, understood and implemented at all levels within the company.
